Permits/Mitigation & Support Division General Permits

GP	Comments	Expires	Status		
GPs 1 through 4 were replaced by GPs 5 through 10 and have expired.					
<u>GP-5</u>	Provides for the construction and maintenance of a ring levee and board road for the purpose of oil and gas exploration and production.	2/11/2014	Current		
<u>GP-6</u>	Provides for the installation, replacement, maintenance, and removal of up to 10,000 linear feet of pipeline in vegetated wetlands, spoil banks, and open water areas.	2/17/2014	Current		
<u>GP-7</u>	Provides for dredging to construct a parallel slip adjacent to an existing man-made canal or slip, for dredging to deepen an existing slip, and for dredging to construct an oil or gas access canal or slip. This general permit also authorizes the removal and replacement of existing plugs in oil and gas canals to access work sites approved under this general permit and the construction of plugs in oil and gas access canals constructed under the authority of this general permit.	2/17/2014	Current		
GP-8	Provides for the construction of wave dampening fences in shallow water locations. Individual fence units may vary in overall dimensions with maximum segment length not to exceed 150', maximum width not to exceed 12' and height not to greater than 6'. Units to be constructed of treated lumber, galvanized fencing or other suitable, CMD approved materials. Christmas trees or other clean suitable brush may be used to fill fence units when design requires.	7/17/2012	Current		
GP-9	Replaced by GP-18	Expired and will not be reissued			
<u>GP-10</u>	Provides for the maintenance of existing channels, canals, and slips that are used for access to oil, gas, and salt water disposal wells and production facilities within the Coastal Zone of Louisiana	7/17/2012	Current		
<u>GP-11</u>	Mitigation projects for permitted activities.	3/2/2011	Current		
<u>GP-12</u>	Provides for a one-time mobilization for the maintenance of existing channels, canals, and slips that are used for access to oil, gas, and salt water disposal wells and production facilities within the Coastal Zone of Louisiana and that are located in fields in which the applicant has a valid Coastal Use Field-Wide Maintenance Dredging Strategy Permit.	7/17/2012	Current		
<u>GP-13</u>	Provides for a one-time mobilization for the maintenance dredging of existing channels, canals, and ditches that are utilized for the management of surface water flow.	7/17/2012	Current		
<u>GP-14</u>	Provides for a one-time mobilization for the installation, maintenance, removal, and repair of utility lines, wires, cables, conduits, pipes for water pipelines, and fiber optic bundles in	7/17/2012	Current		

	new or existing corridors within the Louisiana Coastal Zone.		
<u>GP-15</u>	Provides for the maintenance dredging of existing channels, canals, and ditches that are utilized for commercial purposes or private navigation within the Louisiana Coastal Zone.	7/17/2012	Current. Revisions under consideration
<u>GP-16</u>	Provides a one-time mobilization for the construction of new Channels, Canals, and Slips that are used for access to Oil, Gas, and Salt Water Disposal Wells and Production Facilities within the Coastal Zone of Louisiana and that are located in open water, excluding Lake Pontchartrain and Lake Maurepas.	7/17/2012	Current
<u>GP-17</u>	Dredging of waterbottoms in order to restore and stabilize shorelines and subsiding marsh and for the construction and maintenance of crevasses. This General Permit shall only apply to activities conducted by the Louisiana Department of Natural Resources' Coastal Restoration Division.	7/17/2012	Current
<u>GP-18</u>	Placement of a maximum of 280 cubic yards of fill for the construction of driveway up to 100 feet long, x 10 feet wide, placement of up to 100 cubic yards of fill in order to construct a 12 foot x 40 foot parking area, dredging of up to 100 cubic yards of material in order to construct boat slip up to a 20 feet x 20 feet x 6 feet, the placement of approximately 50 cubic yards of fill in order to construct a storage area up to 20 feet x 20 feet and up to 100 cubic yards of dredging and up to 100 cubic yards of fill in order to construct a bulkhead to stabilize the shoreline within the boatslip and up to 25 feet on both sides of the boatslip on the waterway shoreline	2/17/2014	Current
<u>GP-19</u>	Provides for a one-time mobilization for minor oil and gas activities such as those caused by the construction and installation of platforms, towers, landing pads, structures used to support pipelines and cables, staging and work areas, and parking areas that have a total area of 1.0 acres or less, with no more than 0.1 acres of vegetated wetlands impact, within the Coastal Zone of Louisiana.	11/25/2013	Current
<u>GP-20</u>	Provides for the oil field restoration activities including the construction and maintenance of ring levees, construction and maintenance of board roads, and dredging and maintenance dredging of access channels within the Coastal Zone of Louisiana.	2/17/2014	Current
<u>GP-21</u>	Provides for the placement of up to 10,000 cubic yards of shell, crushed limestone, or other material approved by the Coastal Management Division, in order to construct drilling and production facility (compressor barges, tank barges, and etc.) foundation pads with maximum dimensions of 250 feet in length and 225 feet in width.	1/5/2012	Current
<u>GP-22</u>	Provides for the authorization of seismic survey operations in the Louisiana Coastal Zone.	11/1/2010	Current
<u>GP-23</u>	Provides for the maintenance of existing trenasses to a	7/17/2012	Current

	maximum width of 6' and a maximum depth of 3'		
<u>GP-25</u>	Provides for the construction of a minimally-sized ring levee adjacent to an existing board road or ring levee.	10/9/2014	Current
<u>GP-26</u>	Provides for dredging to construct a minimally-sized parallel slip adjacent to a man-made canal or slip.	10/9/2014	Current
<u>GP-29</u>	Provides for the authorization of emergency repair and cleanup activities due to natural or manmade disasters.	5/12/2011	Current
